

## **APPENDIX III**

### **Threshold Hazard Factors**

**Examples of the facilities covered by the three Threshold Hazard Factors are given in the following table:**

Low Threshold Hazard Factor	Medium Threshold Hazard Factor	High Threshold Hazard Factor
<p>Domestic quantities and uses of hazardous substances, garden pesticides and herbicides and other substances.</p> <p>Retail outlets selling domestic scale quantities of hazardous substances including supermarkets, hardware stores, pharmacies, garden centres.</p> <p>Educational facilities using small-scale quantities of hazardous substances school laboratories.</p> <p>Chemicals for the operation of private swimming pools.</p> <p>Farm and forest scale use of agricultural chemicals and fertilisers used in primary production activities.</p>	<p>Commercial scale spray-painting operations.</p> <p>Dry Cleaners</p> <p>Engineering Workshops.</p> <p>Motor vehicle repair workshops and garages.</p> <p>The storage and retail sale of agricultural chemicals and fuels direct to primary production users (including stock and station agents premises).</p> <p>Service stations and the retail sale of LPG.</p> <p>Bulk Storage of fertiliser in the Industrial Zone.</p>	<p>Galvanising plants.</p> <p>Electroplating and metal treatment activities.</p> <p>Chemical warehouses (including bulk storage areas for agrochemicals, and fertilisers (outside of the Industrial Zone).</p> <p>Explosive magazines.</p> <p>Chemical manufacturing processes (including industries manufacturing, storing or processing agrochemicals, fertilisers or paints).</p> <p>Tanneries.</p> <p>Timber treatment plants.</p> <p>Freezing works and rendering plants.</p> <p>Wastewater treatment plants.</p> <p>Milk treatment plants.</p> <p>Fumigation processes or activities.</p> <p>Drum re-conditioners.</p> <p>Asphalt/bitumen manufacture or storage.</p> <p>Bulk fuel or bulk LPG. Storage.</p> <p>Metal smelting and refining (including battery refining and recycling).</p> <p>Fibreglass manufacture.</p> <p>Polymer foam manufacture.</p>
